

## Anti-Human CD294-163Dy

**Catalog #:** 3163003B

**Package Size:** 100 tests

**Storage:** Store product at 4°C. Do not freeze.

**Cross Reactivity:** Human

**Clone:** BM16

**Isotype:** Rat IgG2a

**Formulation:** Antibody stabilizer with 0.05% Sodium Azide

### Technical Information

**Validation:** Each lot of conjugated antibody is quality control tested by CyTOF® analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

**Recommended Usage:** The suggested use is 1 µl for up to 3 X 10<sup>6</sup> live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs stained with 151Eu-anti-CD123 (6H6) and 163Dy-anti-CD294/CRTH2 (BM16).

### Description

CD294, also known as CRTH2, is a G-protein-coupled receptor expressed by Th2 lymphocytes, eosinophils and basophils, which mediates the activation of these cell types in response to the mast cell product prostaglandin D2. CRTH2 plays an important role in mast cell-dependent activation of both Th2 lymphocytes and eosinophils, promoting both increased cell migration and production of Th2 cytokines. Studies on CRTH2-deficient mice or on animals treated with small-molecule antagonists have highlighted the involvement of this receptor in effector responses to allergen including leucocyte accumulation, Th2 cytokine production, tissue swelling, airway hyperresponsiveness and production of IgE.
