

Anti-Human CD45RA-169Tm

Catalog #: 3169008B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Cross Reactivity: Chimpanzee

Clone: HI100

Isotype: Mouse IgG2b

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Human PBMCs stained with 164Dy-anti-CD45RO (UCHL1) and 169Tm-anti-CD45RA (HI100). Lymphocytes are displayed in the analysis.

Description

CD45RA is a type I transmembrane glycoprotein. It is a specific splice variant of the transmembrane tyrosine phosphatase CD45. The CD45RA isoform is most highly expressed on resting/naive T cells, B cells and monocytes. Like CD45 on these cells CD45RA's intracellular domain is a tyrosine phosphatase that serves to regulate signal transduction event - in particular, enhancing both T cell receptor and B cell receptor signaling.
