

Anti-Mouse CD8a-168Er

Catalog #: 3168003B

Package Size: 100 tests

Storage: Store product at 4°C. Do not freeze.

Cross Reactivity: Mouse

Clone: 53-6.7

Isotype: Rat IgG2a

Formulation: Antibody stabilizer with 0.05% Sodium Azide

Technical Information

Validation: Each lot of conjugated antibody is quality control tested by CyTOF[®] analysis of stained cells using the appropriate positive and negative cell staining and/or activation controls.

Recommended Usage: The suggested use is 1 µl for up to 3 X 10⁶ live cells in 100 µl. It is recommended that the antibody be titrated for optimal performance for each of the desired applications.

Mouse splenocytes stained with 152Sm anti-CD3e(145-2C11) and 168Er anti-CD8 (53-6.7). Total viable cells are displayed in the analysis.

Description

CD8, also known as T8, Lyt-2, or Ly2, is a type I membrane glycoprotein consisting of two disulfide-linked chains (CD8a, CD8b). CD8 is a member of the immunoglobulin superfamily, and is found on the majority of thymocytes, a subset of peripheral blood T cells. A subset of NK cells (which express almost exclusively CD8a homodimers). CD8 acts as a co-receptor with MHC class I-restricted T cell receptors in antigen recognition and T cell activation and has been shown to play a role in thymic differentiation. Two domains in CD8a are important for function: the extracellular IgSF domain binds the α3 domain of MHC class I and the cytoplasmic CXCP motif binds the tyrosine kinase p56 Lck
