

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
 Catalog ID number: 201194, 201198

SECTION 1 - IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

Contact information

General	Fluidigm Corporation 7000 Shoreline Court Suite 100, South San Francisco, CA 94080 Main (U.S.): +1 (650) 266-6000 E-mail: techsupport@fluidigm.com
Emergency telephone number	+ (650) 266-6100 (outside US) + (866) 358-4354 (toll free)

Product identifier	Cell-ID™ Cisplatin (194Pt and 198Pt)
Synonyms	None identified
Trade names	None identified
Chemical family	Mixture is a suspension of Monoisotopic cisplatin, a cytotoxic agent, in DMSO
Relevant identified uses of the substance or mixture and uses advised against	For research use only. Not for use in diagnostic procedures.
Note	This SDS is written to address potential health and safety issues associated with the handling of the formulated product.
Issue Date	23 June 2015

SECTION 2 - HAZARDS IDENTIFICATION

Classification of the substance or mixture

Globally Harmonized System [GHS]	Flammable liquid - Category 4. Germ Cell Mutagenicity - Category 1B. Carcinogenic - Category 1B. Irritant (skin) - Category 2.
AU Hazard Classification (NOHSC)	Hazardous substance. Non-hazardous goods.

Label elements

CLP/GHS hazard pictogram

CLP/GHS signal word

Danger

CLP/GHS hazard statements

H227 - Combustible liquid. H315 - Causes skin irritation. H340 - May cause genetic defects. H350 - May cause cancer.

CLP/GHS precautionary statements

P201 - Obtain special instructions before use. P210 - Keep away from heat/sparks/ open flames/hot surfaces. - No smoking. P264 - Wash hands thoroughly after handling. P280 - Wear protective gloves/eye protection/face protection. P302 + P352 - If on skin: Wash with plenty of soap and water. P321 - Specific treatment (see First Aid information on product label and/or Section 4 of the SDS). P308 + P313 - If exposed or concerned: get medical advice/attention. P332 + P313 - If skin irritation occurs: Get medical advice/attention. P362 - Take off contaminated clothing and wash before reuse. P370 +P378 - In case of fire: Use water spray (fog), foam, dry powder or carbon dioxide for extinction. P403 + P235 - Store in a well-ventilated place. Keep cool. P405 - Store locked up. P501 - Dispose of contents/container to location in accordance with local/regional/national/ international regulations.

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
Catalog ID number: 201194, 201198

Other hazards Mixture contains cisplatin, a cytotoxic anticancer agent.

The most common adverse effects reported in with clinical use of cisplatin include severe nausea and vomiting, peripheral neuropathies (pain or numbness in the extremities), kidney toxicity, myelosuppression (characterized by decreases in white blood cells and platelets), hearing loss, and ocular toxicity. Cumulative renal insufficiency is the major dose-limiting toxicity of cisplatin. Allergic reactions, including facial swelling, wheezing, fast heart rate, and hypotension, have also been reported and may occur within minutes of drug administration. Other reported adverse effects have included hair loss, malaise, cardiac abnormalities, rash, and asthenia (weakness). Cisplatin and other platinum-containing salts are considered to be irritating and corrosive to skin after direct contact, capable of inducing a burning sensation in the eyes, lacrimation, and conjunctival hyperemia (increased blood flow into the eyeball), and irritating to the respiratory tract following inhalation. Cisplatin exposure has been associated with decreased spermatogenesis and abnormal Leydig cell function in men. Sperm production was found to return to normal in 50-60% of men between 1 and 3 years following treatment cessation. Based on its mechanism of action and the embryotoxicity noted in animals, cisplatin may adversely affect a developing fetus.

Note This mixture is classified as hazardous according to Regulation EC No 1272/2008 (EU CLP) and Hazard Communication Standard No. 1910.1200 (US OSHA).

SECTION 3 - COMPOSITION/INFORMATION ON INGREDIENTS

<u>Ingredient</u>	<u>CAS #</u>	<u>EINECS/ ELINCS#</u>	<u>Amount</u>	<u>GHS Classification</u>
Cisplatin	7440-06-4	N/A	0.03%	ATO2: H300; STOT-S1: H370; STOT-S3: H335; STOT-R1: H372; RT1A: H360FD; GCM1B: H340; Carc1B: H350; SC1: H314; EC1: H318
Dimethyl sulfoxide	67-68-5	200-664-3	100%	SI2: H315

Note The ingredients listed above are considered hazardous. The remaining components are non-hazardous and/or present at amounts below reportable limits. See Section 16 for full text of GHS classifications.

SECTION 4 - FIRST AID MEASURES

Description of first aid measures

Immediate Medical Attention Needed	Yes
Eye Contact	If easy to do, remove contact lenses, if worn. Immediately flush eyes with copious quantities of water for at least 15 minutes. If irritation occurs or persists, notify medical personnel and supervisor.
Skin Contact	Wash exposed area with soap and water and remove contaminated clothing/shoes. If irritation occurs or persists, notify medical personnel and supervisor.
Inhalation	Immediately move exposed subject to fresh air. If not breathing, give artificial respiration. If breathing is labored, administer oxygen. Immediately notify medical personnel and supervisor.
Ingestion	Do not induce vomiting unless directed by medical personnel. Do not give anything to drink unless directed by medical personnel. Never give anything by mouth to an unconscious person. Notify medical personnel and supervisor.
Protection of first aid responders	See Section 8 for Exposure Controls/Personal Protection recommendations.

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
Catalog ID number: 201194, 201198

Most important symptoms and effects, both acute and delayed See Sections 2 and 11.

Indication of immediate medical attention and special treatment needed, if necessary Contains the cytotoxic agent, cisplatin. Medical conditions aggravated by exposure: Myelosuppression. Renal impairment. Hypersensitivity to cisplatin or platinum-containing compounds. Treat symptomatically and supportively. If accidental exposure occurs to an individual who is also taking one or more concomitant medications, consult the respective package or prescribing information for potential drug interactions.

SECTION 5 - FIREFIGHTING MEASURES

Extinguishing media Use water spray (fog), foam, dry powder, or carbon dioxide, as appropriate for surrounding fire and materials.

Specific hazards arising from the substance or mixture No information identified. May emit carbon monoxide, carbon dioxide, oxides of nitrogen, sulfur and platinum-containing compounds.

Flammability/Explosivity Combustible liquid and vapor. Keep away from heat and flame. Vapors are heavier than air and may flow along surfaces to remote ignition sources and flashback.

Advice for firefighters In case of a fire, keep containers cool with water and remove from fire area. Wear full protective clothing and an approved, positive pressure, self-contained breathing apparatus. Wash all equipment thoroughly after use. Dike area if possible to contain water for later disposal.

SECTION 6 - ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures If product is released or spilled, take proper precautions to minimize exposure by using appropriate personal protective equipment (see Section 8). Area should be adequately ventilated. Do not breathe mist/vapors/spray.

Environmental precautions Do not empty into drains. Avoid release to the environment.

Methods and material for containment and cleaning up Remove sources of ignition. Dike area to contain spill. Maintain ventilation until all vapors have been eliminated. Take precautions as necessary to prevent contamination of ground and surface waters. Absorb and/or contain spill with inert materials (e.g., sand, vermiculite or other appropriate material), then place in appropriate container. For large spills, use water spray to disperse vapors; flush spill area. Do not flush to sewer. Prevent run-off from entering drains, sewers, or waterways.

Reference to other sections See Sections 8 and 13 for more information.

SECTION 7 - HANDLING AND STORAGE

Precautions for safe handling If vials are crushed or broken, drug substance may be released into the air. Minimize generation and accumulation of airborne material. Follow recommendations for handling bulk formulated/package cytotoxic pharmaceutical agents (i.e., use of engineering controls and/or other personal protective equipment if needed). Wash thoroughly after handling. Avoid breathing vapor or mist. Do not permit eating/drinking/smoking near this material. All materials used for transferring or preparing this product must be considered contaminated and disposed of properly.

Conditions for safe storage including any incompatibilities Store at -20°C away from strong oxidizing agents. Keep away from heat and sources of ignition. Store locked up. Store in sealed containers that are appropriately labeled.

Specific end use(s) No information identified.

SECTION 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION

Note Dispose of broken vials/syringes in a sharps container.

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
Catalog ID number: 201194, 201198

Control

Parameters/Occupational

Exposure Limit Values

<u>Compound</u>	<u>Issuer</u>	<u>Type</u>	<u>OEL</u>
Cisplatin	ACGIH	TLV	2 µg/m ³
	OSHA	PEL	2 µg/m ³
	Belguim, Hungary, New Zealand	TWA	2 µg/m ³
	Japan	OEL	1 µg/m ³
	Switzerland	MAK	2 µg/m ³
	United Kingdom	TWA	20 µg/m ³
	Dimethyl sulfoxide	AIHA	WEEL-TWA
Austria, Germany, Switzerland		MAK	50 ppm, 160 mg/m ³
Estonia, Lithuania, Sweden		STEL	150 ppm, 500 mg/m ³
Estonia, Lithuania		TWA	50 ppm, 150 mg/m ³
Sweden		TLV	50 ppm, 150 mg/m ³
Finland		TWA	50 ppm
Switzerland		STEL	100 ppm, 320 mg/m ³
Germany		Ceiling	100 ppm, 320 mg/m ³
Denmark		TWA	50 ppm, 160 mg/m ³
Slovenia		TWA	160 mg/m ³
Denmark		TWA	50 ppm, 160 mg/m ³

Exposure/Engineering controls

If handling bulk product or vials are opened/crushed/broken: Control exposures to below the OEL (if available). Otherwise, selection and use of containment devices and personal protective equipment should be based on a risk assessment of exposure potential. Open handling should not be performed when handling potent substances, or substances of unknown toxicity. Material should be handled inside a closed process, ventilated enclosure, isolator or device of equivalent or better control that is suitable for dusts and/or aerosols.

Respiratory protection

If handling bulk product or vials are opened/crushed/broken: Choice of respiratory protection should be appropriate to the task and the level of existing engineering controls. For routine handling tasks, an approved and properly worn powered air- purifying respirator equipped with appropriate HEPA filters or combination filters should provide ancillary protection based on the known or foreseeable limitations of existing engineering controls. Use a positive-pressure air-supplied respirator if there is any potential for an uncontrolled release, when exposure levels are not known, or in any other circumstances where air purifying respirators may not provide adequate protection.

Hand protection

Wear nitrile or other impervious gloves if skin contact is possible. Double gloves should be considered. When the material is diluted in an organic solvent, wear gloves that provide protection against the solvent.

Skin protection

Wear appropriate gloves, lab coat, or other protective overgarment if skin contact is likely. Base the choice of skin protection on the job activity, potential for skin contact and solvents and reagents in use.

Eye/face protection

Wear safety glasses with side shields, chemical splash goggles, or full face shield, if necessary. Base the choice of protection on the job activity and potential for contact with eyes or face. An emergency eye wash station should be available.

Environmental Exposure Controls

Avoid release to the environment and operate within closed systems wherever practicable. Air and liquid emissions should be directed to appropriate pollution control devices. In case of spill, do not release to drains. Implement appropriate and effective emergency response procedures to prevent release or spread of contamination and to prevent inadvertent contact by personnel.

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
 Catalog ID number: 201194, 201198

Other protective measures

Wash hands in the event of contact with this substance, especially before eating, drinking or smoking. Protective equipment is not to be worn outside the work area (e.g., in common areas or out-of-doors).

SECTION 9 - PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Appearance	Clear liquid
Color	Colorless
Odor	No information identified.
Odor threshold	No information identified.
pH	No information identified.
Melting point/freezing point	16.1-18.9°C (61-66°F)
Initial boiling point and boiling range	189°C (372°F)
Flash point	No information identified.
Evaporation rate	No information identified.
Flammability (solid, gas)	No information identified.
Upper/lower flammability or explosive limits	No information identified.
Vapor pressure	0.41 mmHg @ 20°C (68°F)
Vapor density	1.1 g/cm ³
Relative density	No information identified.
Water solubility	Completely miscible in water.
Solvent solubility	No information identified.
Partition coefficient (n-octanol/water)	No information identified.
Auto-ignition temperature	No information identified.
Decomposition temperature	No information identified.
Viscosity	No information identified.
Explosive properties	No information identified.
Oxidizing properties	No information identified.

Other information

Molecular weight	300.05 (cisplatin)
Molecular formula	Cl ₂ H ₆ N ₂ Pt (cisplatin)

SECTION 10 - STABILITY AND REACTIVITY

Reactivity	No information identified.
Chemical stability	Stable under normal temperatures and pressures.

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
Catalog ID number: 201194, 201198

Possibility of hazardous reactions No information identified.

Conditions to avoid Avoid direct sunlight and conditions that might generate heat. Avoid flames, sparks, and other sources of ignition such as shock or friction. Avoid dispersion as a dust cloud.

Incompatible materials Strong oxidizing agents

Hazardous decomposition products No information identified.

SECTION 11 - TOXICOLOGICAL INFORMATION

Information on toxicological effects

Route of entry May be absorbed by inhalation, skin contact and ingestion.

Acute toxicity

<u>Compound</u>	<u>Type</u>	<u>Route</u>	<u>Species</u>	<u>Dose</u>
Cisplatin	LD ₅₀	Oral	Rat	14.5 mg/kg
	LD ₅₀	Oral	Mouse	32.7 mg/kg
	LD ₅₀	Intravenous (IV)	Rat	8 mg/kg
	LD ₅₀	Intravenous (IV)	Mouse	11 mg/kg
Dimethyl sulfoxide	LC ₅₀	Inhalation	Rat	40250 ppm
	LD ₅₀	Oral	Rat	14.5 g/kg
	LD ₅₀	Oral	Rat	28.3 g/kg
	LD ₅₀	Oral	Mouse	7.9 g/kg
	LD ₅₀	Oral	Mouse	21.4 g/kg

Irritation/Corrosion Cisplatin can cause eye, skin and/or respiratory tract irritation. Dimethyl sulfoxide is a skin irritant in humans and animals.

Sensitization No information identified.

STOT-single exposure In rats, single intraperitoneal (IP) injections up to 12.2 mg/kg cisplatin caused leukopenia (characterized by decreases in neutrophils, lymphocytes, and platelets) and bone marrow depression, generalized lymphoid depletion, and intestinal/renal tubular injury, which were most severe 2-4 days post-injection. Similar target organ effects were noted in dogs following single IV doses of 2.5 mg/kg or 5 consecutive intravenous (IV) doses of 0.75 mg/kg/day. Heart effects and sperm degeneration were also seen in monkeys following acute exposure. Three groups of male rats were exposed to an aerosol of 1600 mg/m³ DMSO for four hours. Groups were sacrificed immediately after exposure, 24 hours after exposure, or two weeks after exposure. There was no mortality and none of the animals displayed outward signs of toxicity during and after exposure to DMSO. Organs appeared normal at necropsy. Single IV injections of undiluted DMSO were administered to groups of male and female rats. Dose levels were 2.5, 5.0, and 10 g/kg. Each dose was administered over a 1-minute interval. Animals were observed for 14 days following DMSO administration. With one exception, deaths occurred within the first 24 hours. Non-lethal doses of DMSO produced decreased motor activity and myasthenia.

STOT-repeated exposure/Repeat-dose toxicity Male rats were exposed to 200 mg/m³ DMSO for seven hours/day, five days a week, over six weeks for 30 exposures. There were no outward toxic signs noted in any of the exposed animals throughout the experimental period of six weeks and no effects on blood parameters were reported. DMSO was administered dermally to normal and abraded rabbit skin for 26 weeks at a dose of 1 or 5 g/kg/day. At 23 weeks, treatment was withheld from some animals due to ocular changes; the remaining animals continued to receive DMSO applications for the scheduled 26 weeks. Mortality was high in all groups, however there was no significant differences in mortality between groups. There were no clinical signs to suggest systemic toxicity. DMSO was administered as a 90% solution to rhesus monkeys by gastric intubation, seven days a week for up to 87 weeks. Doses administered were equivalent to 990, 2970, and 8910 mg/kg/day. The principal physical signs seen in the animals given DMSO orally included excess salivation and emesis. These

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
Catalog ID number: 201194, 201198

signs occurred sporadically and did not appear to be related to the dose except in the group receiving higher volume of compound. Anorexia occurred at high oral doses but was not evident at the two lower dose levels. No DMSO-related changes were found in the treated monkeys during physical examinations.

Reproductive toxicity Similar adverse effects on spermatogenesis seen in humans were noted in monkeys administered cisplatin (additional details not provided). DMSO has been extensively used as a cryoprotectant in the freezing of early experimental animal and human embryos. The viability and apparent normalcy of frozen embryos after thawing suggests that DMSO exposure is not toxic to the early embryo.

Developmental toxicity In rats, IP doses of cisplatin ≥ 0.25 mg/kg/day before mating through gestation increased the number of resorptions and decreased the post-natal viability and exploratory behavior of surviving offspring; doses of 0.5 mg/kg/day caused embryo lethality and growth retardation. In rabbits, embryo lethality was noted at IP doses >0.125 mg/kg/day, but no teratogenic effects were seen at doses up to 0.5 mg/kg/day. In mice, IP doses of 10 mg/day administered during organogenesis led to retarded growth and bone formation, but caused no major malformations. A single IP dose of ≈ 3 mg/kg of cisplatin on day 8 of pregnancy was fetal to $\sim 30\%$ of fetuses. Surviving offspring showed growth retardation and had a number of minor skeletal abnormalities. DMSO has been associated with teratogenic and/or embryotoxic effects in the hamster, rat, mouse, and chick at high doses. In the hamster, the injection of 500 to 800 mg/kg on the 8th day of gestation was associated with a wide variety of congenital defects, including exencephaly, microphthalmia, bone and limb abnormalities, and as cleft lip. Increased frequencies of fetal death were observed when pregnant rats or rabbits were treated with doses of 5-10 or 1-3 g/kg/day, respectively. However, fetal death was not increased in another study after intraperitoneal treatment of pregnant rats with 6.9 g/kg/day of dimethyl sulfoxide. No malformations were observed in the offspring of rats treated with dimethyl sulfoxide at doses of 0.2-5 g/kg/day during pregnancy.

Genotoxicity Cisplatin was mutagenic in bacteria and produced chromosomal aberrations, micronuclei, and sister chromatid exchanges (SCEs) in cultured animal and human cells. It also induced SCEs *in vivo* in rodents, but did not cause *in vivo* dominant lethal mutations in mice. DMSO was negative for genotoxicity in an Ames bacterial cell mutagenicity assay and a sister chromatid exchange assay in Chinese hamster ovary cells. Dimethyl sulfoxide was negative for genotoxicity in an Ames bacterial cell mutagenicity assay and a sister chromatid exchange assay in Chinese hamster ovary cells.

Carcinogenicity Weekly IP injections of a 0.85% cisplatin solution in mice (delivering cisplatin doses equivalent to 1.62 mg/kg) for 16 weeks significantly increased lung adenomas; skin papillomas were increased when cisplatin was co-administered with croton oil as a promoter twice weekly for 52 weeks. In two rat studies, multiple IP injections (3 times 1 mg/kg/week for 3 weeks) induced leukemia. Overall, cisplatin was carcinogenic to rodents at low, occupationally relevant doses. Cisplatin is also listed as a carcinogen by OSHA, IARC (Group 2A - "Probably carcinogenic to humans"), and NTP ("Reasonably anticipated to be a human carcinogen").

Aspiration hazard No data available.

Human health data See Section 2 - "Other hazards"

SECTION 12 - ECOLOGICAL INFORMATION

Toxicity

Compound	Type	Species	Concentration
Cisplatin	LC ₅₀ (96 h)	Fish	34 g/L
Dimethyl sulfoxide	EC ₅₀ /96h	Skeletonema costatum (Diatom)	12.35 - 25.5 g/L
	LC ₅₀ /96h	Pimephales promelas	34 g/L
	LC ₅₀ /96h	Oncorhynchus mykiss	33-37 g/L (static)
	LC ₅₀ /96h	Lepomis macrochirus	>40 g/L (static)
	LC ₅₀ /96h	Cyprinus carpio	41.7 g/L
	EC ₅₀ /24h	Daphnia magna	7 g/L

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
Catalog ID number: 201194, 201198

Persistence and Degradability	Cisplatin is not readily biodegradable.
Bioaccumulative potential	No data identified.
Mobility in soil	No data identified.
Results of PBT and vPvB assessment	Not performed.
Other adverse effects	No data identified.
Note	The environmental characteristics of the formulated product have not been fully investigated. Releases to the environment should be avoided.

SECTION 13 - DISPOSAL CONSIDERATIONS

Waste treatment methods	Dispose of wastes in accordance to prescribed federal, state, and local guidelines, e.g., appropriately permitted chemical waste incinerator. Do not send down the drain or flush down the toilet. All wastes containing the material should be properly labeled. Rinse waters resulting from spill cleanups should be discharged in an environmentally safe manner, e.g., appropriately permitted municipal or on- site wastewater treatment facility.
--------------------------------	---

SECTION 14 - TRANSPORT INFORMATION

Transport	The concentration of hazardous material in this product's composition is below that which is regulated for transport. DOT.: This solution is considered non-hazardous for transport. IATA: This solution is considered non-hazardous for air transport.
UN number	None assigned.
UN proper shipping name	None assigned.
Transport hazard classes and packing group	None assigned
Environmental hazards	Based on the available data, this mixture is not regulated as an environmental hazard or a marine pollutant.
Special precautions for users	Avoid release to the environment.
Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code	Not applicable.
Hazardchem Code/HIN	None assigned.

SECTION 15 - REGULATORY INFORMATION

Safety, health and environmental regulations /legislation specific for the substance or mixture	This SDS complies with the requirements under US, EU and GHS (EU CLP - Regulation EC No 1272/2008) guidelines. Consult your local/regional authorities for more information.
Chemical safety assessment	Not conducted.
OSHA Hazardous	Contains the cytotoxic drug, cisplatin. Combustible liquid and vapor. Harmful if swallowed. Causes skin irritation. Can cause damage to immune, hematological, gastrointestinal, and central nervous systems. Possible cancer hazard - contains material which may cause cancer. Potential mutagenicity hazard - contains material which may be mutagenic. Reproductive hazard - can cause adverse reproductive effects in males. Possible developmental hazard - may cause adverse developmental effects and birth defects (based on animal data).
WHMIS classification	FL4: H227; GCM1B: H340; Carc1B: H350; SI2: H315
TSCA status	Drugs are exempt from TSCA.

SAFETY DATA SHEET

Product Identifier: Cell-ID™ Cisplatin (194Pt and 198Pt)
Catalog ID number: 201194, 201198

SARA section 313 Not listed.

California proposition 65 Cisplatin is listed as carcinogenic.

Component Analysis - State Cisplatin is listed as hazardous in CA, MA, ME, MN, NJ, PA, and RI.

Component Analysis – Chemical Inventory Cisplatin is listed in the chemical inventory of the following countries: Australia, China, Canada, and EU.

SECTION 16 - OTHER INFORMATION

NFPA Ratings	Cisplatin	Health: 3	Fire: 0	Reactivity: 0
